For over 50 years, Cedar Forest Products (CFP) has been designing and creating shelters for public and private parks, camps and recreation facilities. CFP offers prefabricated and engineered products including: park pavilions, gazebos, bridges, pergolas, kiosks, cedar cabins, cedar homes and cedar multi-use facilities. Choose from standard designs or create one that is custom. All products are designed to perform and built to last.

Since 1964, Cedar Forest Products has been supplying wood shelters and pavilions to meet the wide ranging needs of its customers. CFP uses glue-laminated timber, or glulam, as it is a highly innovative construction material. Pound for pound, glulam is stronger than steel and has greater strength and stiffness than comparably sized dimensional lumber. The natural beauty of wood helps to enrich the landscape in any setting.
Standard Features

Pre-Engineered Designs
- Each shelter is pre-engineered to meet or exceed local building requirements
- Stamped and sealed drawings and calculations completed by a structural engineer to meet a project's state and local building codes

Structure Frame
- Glulam Southern Yellow Pine (SYP)
- Each shelter is designed to meet the local snow and wind loads
- All metal connectors have a factory applied powder coat finish in Railing Black

Columns
- Port Orford Cedar columns – direct embedded in concrete footings
- Port Orford Cedar provides superior resistance against rot and decay

Roofing
- #1 grade, kiln dried 2” x 6” SYP roof decking
- 2” x 8” Western Red Cedar fascia
- 30-year architectural grade shingle package

Optional Features
Color options and selections shown on page 58.

- Cedar Roof Decking: #1 grade, kiln dried 2” x 6” Alaskan Yellow Cedar
- Cedar Shingles: Can be used on most shelters
- Metal Roofing: 29 gauge max rib or 26 gauge standing seam roofing packages
- Cupola: Prefabricated cupolas can be added to most shelters
- Cedar Glulam Frame: Alaskan Yellow Cedar can be used on most shelter frames
- Steel Columns: Powder coated steel columns
- Metal Base Shoes: Powder coated shoes for surface mount
- Ornamentation: Prebuilt cedar handrails and decorative wood ornamentation
- Roof Pitches: Shelters can be designed with custom roof pitches
- Factory Finish: Clear coat sealer and color stain options
- Lightning Protection: Lightning rods, cable and grounding equipment
- Customization: Custom sizes and features

800.552.9495
Custom pergolas are fabricated based on either a client’s submitted concepts or the designs created by an architect or contractor. The kits are constructed of the finest grade Western Red Cedar: kiln dried, vertical grain, A and better, clear coastal grown. All hardware is included. Pergolas are designed with function, aesthetics and budget in mind. Below are some standard styles and functions for CFP’s pergola structures.

**Styles**
- Formal/Tuscan
- Contemporary
- Traditional
- Asian
- Mission
- Cantilevered

**Functions**
- Shade Protection
- Kitchen Pergola
- Large Span Pergola
- Rooftop Structures
- Carport
- Commercial Setting

**Options:** Wood Posts · Aluminum Posts · Fiberglass Columns · Privacy Panels · Trellised Posts · Parasoleil Panels

**Formal Pergola:** Large 10” x 10” posts, stout brackets and plinth bases

**Traditional Pergola:** 6” x 6” solid cedar posts and curved brackets

**Shade Mesh:** White stained pergola employing an 80% white shade mesh for added sun protection

**Pergola**
Contemporary Pergola

Simple, clean modern structure with louvered rafters for added shade

A dramatic pergola employing aluminum posts and beams supporting a dense rafter layout in quadrants

Curved Pergola

Cantilever structure with curved purlins which mirror the patio railing below

Unique cantilevered kitchen pergola which eliminates posts in the sitting and traffic areas

Large Area Pergola

Large 18’ x 36’ pergola which frames several parasoleil panels providing shade and interesting patterns on the patio

Carport pergola created to span up to 22’, also employs privacy lattice panels that are freestanding and used as a visual divider
Custom Wood Shelters
Cedar Forest Products has many years of experience creating various wood structures. Whether a standard shelter needs a few custom touches or a complete custom build, CFP can help design a solution that will meet a project’s needs. Here are examples of CFP’s many custom projects.
Open band shells are a perfect spot for community gatherings. CFP’s versatile band shells combine beauty with function. Several of the four standard designs feature dressing rooms, storage space or walls to enclose the graceful Gothic arch style frame. An important acoustical property of wood is its ability to damp vibrations. Cedar is particularly effective at sound insulation and absorption when utilized properly and can help confine noise to certain areas. CFP can customize any band shell or completely create a design to suit any number of community entertainment events, performances and festivals.
Standard Features

Pre-Engineered Designs
- Each band shell is pre-engineered to meet or exceed local building requirements
- Stamped and sealed drawings and calculations completed by a structural engineer to meet a project's state and local building codes

Structure Frame
- Glulam Southern Yellow Pine (SYP)
- Each shelter is designed to meet the local snow and wind loads
- All metal connectors have a factory applied powder coat finish in Railing Black

Columns
- Gothic arch style, glue-laminated SYP columns are either direct embedded in concrete footings or attached at the surface utilizing metal base shoes

Walls
- Band Shell 1, 3 and 4 have nominal 5" x 8" decorative grade cedar walls
- Band Shell 2 walls are 2" x 6" select grade cedar

Roofing
- #1 grade, kiln dried 2" x 6" SYP roof decking
- 2" x 8" Western Red Cedar fascia
- 30-year architectural grade shingle package

Optional Features

Color options and selections shown on page 58.

Metal Base Shoes
Powder coated shoes for surface mount

Lightning Protection
Lightning rods, cable and grounding equipment

Metal Roofing
29 gauge max rib or 26 gauge standing seam roofing packages

Factory Finish
Clear coat sealer and color stain options

Ornamentation
Pre-built cedar handrails and decorative wood ornamentation

Customization
Custom sizes and features

Roof Pitches
Shelters can be designed with custom roof pitches

Cedar Roof Decking
#1 grade, kiln dried 2" x 6" Alaskan Yellow Cedar

Cedar Shingles
Can be used on most shelters

Cedar Glulam Frame
Alaskan Yellow Cedar can be used on most shelter frames

Additional Enclosures
Dressing room(s), storage or restrooms

Steel Shelters

Steel shelters by Cedar Forest Products offer a practical solution with elegant simplicity. Their classic designs can easily be adapted and customized to suit any environment. CFP’s steel shelters make for a fine addition to any park without sacrificing affordability. Decades of skill and experience go into every one of CFP’s durable steel structures. The modern design conceals all bolts and fasteners where possible. People love their versatility and ease of installation. All steel structures are precut, prefabricated and shipped as components of a complete building package, no onsite welding is required.
Standard Features

Pre-Engineered Designs
- Each shelter is pre-engineered to meet or exceed local building requirements
- Stamped and sealed drawings and calculations completed by a structural engineer to meet a project’s state and local building codes

Structure Frame
- Tubular steel frame utilizes hidden bolt and fasteners where possible
- Each shelter is designed to meet the local snow and wind loads
- Frame comes with a durable powder coat finish

Roofing
- 24 gauge multi-rib metal roofing with a Kynar 500 color finish
- Mega rib metal roofing with a Kynar 500 color finish on Barrel Vault structures only
- Trim and fasteners included

Optional Features

Color options and selections shown on page 59.

Roof Decking
#1 grade, kiln dried 2” x 6” SYP roof decking

Finish Roofing
Choose from standing seam or 30-year architectural grade shingles

Roof Pitches
Shelters can be designed with custom roof pitches

Shelter Tiers
Two and three-tiered structures are available

Cupola
Prefabricated cupolas can be added on to most shelters

Ornamentation
Choose from 4 standard or custom handrail and overhead ornamentation

Laser Cut Medallions
Custom medallions can be added

Column Style
Custom designs are available

Metal Base Covers
Powder coated metal cover for exposed metal base plates

Electrical Access & Cutouts
Predrilled electrical chase and receptacle openings can be added

Lightning Protection
Lightning rods, cable and grounding equipment

Customization
Custom sizes and features

www.cedarforestproducts.com
Cedar Forest Products offers a variety of steel pergola styles. Certified welders and craftsmen create a tubular steel frame utilizing clear-span design. Pergolas are shipped ready to assemble with no cutting or welding required. A factory applied powder coat finish is standard on all steel components. Due to the wide variety of options such as columns, supporting beams and members, pergolas are custom in nature, allowing for many designs and sizes. Various beam details including scalloped headers and curved beam options allow for dramatic architectural statements. CFP can create a pergola to fit a project’s specific needs.

Options: Roof Pitches • Shelter Tiers • Ornamentation • Laser Cut Medallions • Column Style • Metal Base Covers • Electrical Access & Cutouts • Customization
Custom Steel Shelters
Cedar Forest Products has many years of experience creating various steel structures. Whether a standard shelter needs a few custom touches or a complete custom build, CFP can help design a solution that will meet a project’s needs. Here are examples of CFP’s many custom projects.
Cedar Forest Products offers a variety of timber wall buildings. Standard buildings are available or CFP’s design services can be used to match a structure to an organization’s exact needs. CFP utilizes its Cedar Wall System for Parkaire activity centers, park cabins, lodge buildings and many other multi-use buildings. All wall components are preassembled and construction coded to assure a perfect fit, then dismantled and delivered to the job site. All structures include engineered drawings and installations instructions. Each building is designed for durability and years of comfort and service.
Standard Features

Pre-Engineered Designs
- Each shelter is pre-engineered to meet or exceed local building requirements
- Stamped and sealed drawings and calculations completed by a structural engineer to meet a project’s state and local building codes
- Restroom facilities meet ADA compliance requirements

Cedar Walls
- Precut, preassembled and construction coded to ensure a perfect fit
- Disassembled and delivered to the construction site
- Made using decorative-grade Western Red Cedar or Northern White Cedar both known for their natural beauty, durability and structural integrity
- Cedar is highly desirable for its resistance to moisture warpage, insects and fungus that can shorten the service life of other wood buildings
- Cedar’s cellular structure also offers a natural thermal efficiency

Exterior Wall Construction
- Nominal 5” x 8” double tongue and groove timbers are used for exterior wall construction
- Dovetail corners augment construction strength, reliability and weather seal
- Predrilled starter holes for 10” coated screws spaced at 30” intervals speed wall construction
- Timbers are cut to length assuring staggered end joints and end matched for precision assembly
- Timbers can be predrilled for electrical conduit
- Electrical outlets are preplanned to meet the project’s needs and can be specified for any location
- Choice of corner styles: Rustic, Log Cabin or Salem Square, see page 58 for options

Roofing
- #1 grade, kiln dried 2” x 6” SYP roof decking
- 2” x 8” Western Red Cedar fascia
- 30-year architectural grade shingle package

Doors, windows and skylights
- Items are shipped to the job site ready for installation
Park and Camp Buildings

Packages and Options

Cedar Forest Products offers plumbing and electrical fixture packages for all Park and Camp buildings. These packages provide all of the fixtures needed to complete the project. They do not include the wiring or conduit. The packages need to be installed by a local plumbing or electrical contractor. HVAC can be added to buildings using a local HVAC contractor.

Plumbing Fixture Packages

- Choice of stainless steel or vitreous china plumbing fixtures
- Plumbing fixtures are normally wall mounted to interior stud walls
- Designs typically allow for an open chase behind the wall for easy maintenance
- Interior walls have a Fiberglass Reinforced Panel (FRP) in the restroom areas for easy cleaning
- Interior multipurpose walls to be finished onsite with provided 1” x 8” cedar or pine paneling
- Standard packages can include: tank-less water heater, sanitary disposal, soap dispenser, wall hydrant and items listed below

**Sinks**
Choice of stainless steel or vitreous china

**Toilets**
Choice of stainless steel or vitreous china

**Urinals**
Choice of stainless steel or vitreous china

**Restroom Toilet Partitions**
Per plan

**Toilet Paper Dispensers**
Per plan

**Paper Towel Dispensers or Hand Dryers**

- **Outlets or GFCI Outlets**
  - Per plan

- **Breaker Boxes**
  - Per plan

- **Overhead HMC Light Sensors**
  - Per plan

Optional Features

Color options and selections shown on page 58.

- **Steel Exterior Doors (single or double)**
  - All hardware included

- **Windows**
  - Per plan, additional windows may be added

- **Display Case**
  - Can be added to most buildings

- **Roll-up Concession Window**
  - All hardware included

- **Garage Doors**
  - All hardware included

- **Metal Roofing**
  - 29 gauge max rib or 26 gauge standing seam roofing packages

- **Cupola**
  - Prefabricated cupolas can be added

- **Factory Finish**
  - Clear coat sealer and color stain options

- **Lighting Protection**
  - Lightning rods, cable and grounding equipment

- **Customization**
  - Custom sizes and features

800.552.9495
The Parkaire Activity Center (PAC) can serve as staff offices, concession stands, restroom facilities or storage. The PAC series features standard floor plans, but can be modified to fit a project's specific needs. The shelter bay can be increased or decreased in 8’ bay increments. This versatile building can be used in a variety of different ways. The standard building features can be found on page 37.

CFP can manufacture Parkaire Activity Centers as enclosed buildings without an attached open picnic shelter. The Parkaire Standalone Restroom (PSR) was created from the growing demand for an economical restroom, concession or storage space on a smaller footprint. PSR buildings can be created from any of CFP’s standard Parkaire designs. The standard building features can be found on page 37.

**Standard Sizes**

| PSR 1 20’ x 12’ with 16’ x 8’ Enclosed
| PSR 2 20’ x 20’ with 16’ x 16’ Enclosed

Standalone restrooms can be configured on other CFP designs.

Hexagon/Octagon Post & Beam Restroom

The combination of post and beam construction offers inviting economy in a hexagon or octagon open shelter shape. The Hexagon/Octagon Post and Beam Restroom facility (HRF/ORF) has many uses and makes for a great focal point in a ball field complex. The small shelter bay can be used for vending or an information center. Both octagon and hexagon models may also be designed as enclosed buildings. The standard building features can be found on page 37.

Penfield

The versatile Penfield was engineered to serve the Air Force on its Northern Michigan base. Some of the many features include a front glass prow with large windows, a spacious activity center and kitchen as well as complete restroom facilities. Custom floor plans are available.

Wesley Acres

Wesley Acres was constructed for Dakota Methodist Church Camps. Offering a 4,500 sq. ft. multifunctional floor plan that can be used for weddings or other large gatherings, it can comfortably seat 120 people. Restrooms, dining hall and large food prep kitchen make this a perfect spot for group events. Custom floor plans are available.
Jester Park

The one-story, 7,000 sq. ft. Jester Park epitomizes smart design and incredible craftsmanship. A full kitchen, dance floor, large gathering space, and restrooms are some of the many features this multiuse building offers. Custom floor plans are available.

Bradford

The Bradford is a stunning example of a park district golf pro shop, food service, office or mezzanine building. With a total of 3,200 sq. ft., full kitchen, restroom facilities and meeting spaces, the Bradford can serve a variety of meeting needs. Custom floor plans are available.
The Reception Center is a tribute to Frank Lloyd Wright which is characterized by a low profile, horizontal expression. The simple and functional plan has 1,000 sq. ft. of balcony space with benches, restrooms, office space and a large gathering area. Custom floor plans are available.

A total of 3,000 sq. ft., the Interpretive Center was designed for the New Jersey Park and Forestry Division. It offers ample floor space and lots of natural lighting from the full-view open gable front. Custom floor plans are available.
CFP’s park cabins are ideal for camps or anyone returning to nature. Cedar Forest Products has designed many cabin projects for county and state park systems, municipal and private camps. The craftsmanship of CFP’s larger buildings can also be found in the cabins. Each one is durably designed for years of comfort and service.

All standard packages come complete with precut and construction coded 5” x 8” cedar exterior timber walls, steel insulated doors, aluminum clad insulated windows, pre-engineered roof trusses, 5/8” APA rated plywood roof sheathing, 30-year architectural grade shingles, 30# felt, 2” x 4” interior wall framing, 3/8” FRP panels for restroom walls, 1” x 8” cedar paneling for all other interior walls and all hardware needed to install supplied materials.

**Options:** Cedar Roof Decking • Cedar Shingles • Metal Roofing • Plumbing Packages • Electrical Packages • Custom Floor Plans • Lightning Protection System • Covered Porches • Roof Pitches

Bridges

Design excellence and uncompromising quality speaks for itself in CFP’s glulam bridge systems. CFP’s bridges blend in beautifully with their natural surroundings, designed for use on: golf courses, waterways, parks, bike and equestrian trails, wildlife areas and business complexes nationwide.

Solid posts, rugged laminated stringers and diaphragms are spaced for maximum load capacity and structural integrity.

Detailed drawings make installation simple and fast.
Built on a reputation that spans many generations!

- Pre-engineered in 4’, 6’, and 8’ clear deck widths with spans ranging from 16’ to 80’

- All standard wood components (except decking) are glulam Southern Yellow Pine, decking is 2” x 6” SYP

- Hardware used to connect glulam components is galvanized steel

- Bridges 4’ and 6’ wide and up to 60’ in length are shipped completely assembled

- Bridges 8’ wide to 60’ in length are shipped with railings assembled but not attached

- Bridge lengths over 60’ are shipped to the site, knocked down and unassembled

**Options:** 5-Rail or 4-Rail Plus Curb Railing Option • Various Deck Widths • Various Bridge Spans • Flat or Cambered Bridge Style
